

Transportation Analytics and Reporting

Powered by Zaar Consultants

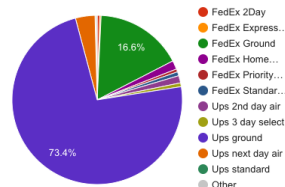

Overview

Detailed reports give quick, actionable insights. Analyze trends and expense drivers like fuel surcharges, accessorials, zones and weight classes using intuitive reports.

Get line-of-sight into your carrier services by reviewing performance metrics. Leveraging data as a powerful, business-growing tool will result in increased revenue.

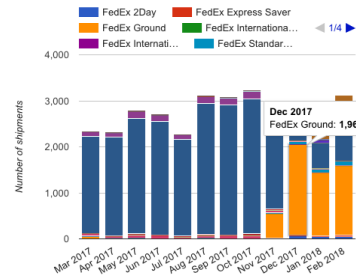

Shipments by service type

Details the number of shipments for each service type as a percentage of total shipments for the period.

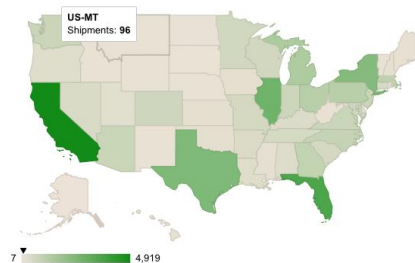

Shipments frequency by service type

Details the number of shipments for a given service type within the period.

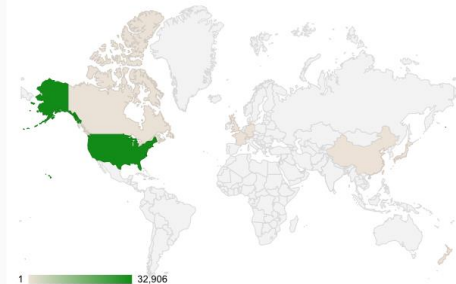

Shipments by domestic geochart

Details the number of shipments shipped to each state for the period.

Shipments by international geochart

Details the number of shipments shipped to each country for the period.

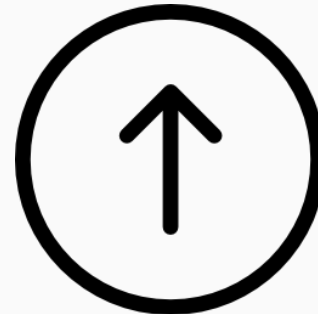

Benefits

Rate negotiation. Zaar Consultants's detailed reporting service helps provide data for rate negotiation on carrier accounts.

Increase efficiency. Detailed reports give managers insight to operational efficiency in small parcel shipping.

Delivery

✓ **Weekly digest reports:** Navigating through the massive amount of logistics data can be a lot like drinking from a fire hydrant. Zaar Consultants takes complex shipping data and breaks it down into easily digestible reports. Weekly emails detail all shipment and audit activities for each FedEx and UPS account.

✓ **Customized detailed reports:** Comprehensive reporting improves operational efficiencies and provides data in an actionable format. The Zaar Consultants reporting dashboard showcases dynamic, real-time data in interactive charts and data tools.

Reporting dashboard

Shipping activity report

Connect your shipping activity and cost data.

Third-party shipping activity report

Discover third-party shipping activity and cost metrics.

Late deliveries report

Use the charts to discover late shipments.

Refund credits report

See the refund credits secured back to your accounts.

Service fees report

View the service fees on the refund credits secured.

Export data

Export data in customized templates

The different types of reports available within Zaar Consultants include:

- **Shipping activity reports**
- **Third-party shipping activity reports**
- **Late shipment reports**
- **Refund credits reports**
- **Service fees report**

Detailed Reports

Late shipment reports: These reports are useful in identifying the number of late shipments. A metric that is useful in rate negotiation.

Service fees: View the service fees on the refund credits secured.

Third-party shipping activity report: Reports to help manage third-party shippers. Exportable lists of unused shipping labels makes it easy to create invoices for unused shipping labels.

Shipping activity reports: Shipment activity reports show the frequency of shipments and the amount spent on each service type over a historical period.

Refund credits: These reports are useful in seeing the savings that Zaar Consultants delivered, and the actions taken on each shipment to secure that refund credit.

Scheduled reports

Schedule emailed reports

Automatically send an email to you and your colleagues each month that includes the report defined by the options in the section below.

Shipping Accounts

UPS #1 (UPS) ▾

Date Range

3 Months ▾

Email recipients (comma separated up to 10)

nick@example.com x george@example.com x

Enabled

All reports can be customized by file type, date range, template and shipping accounts.

Scheduled consolidated PDF reports are sent according to the sending frequency and recipients specified in the reporting dashboard. By default the frequency is monthly, on the first of each month, and distributed to up to 10 recipients.

Screenshot refund verification

Parcel auditors don't always provide detailed documentation on refunds. That's not the case with Zaar Consultants.

Every credit is reconciled and proof of the actions taken by Zaar Consultants to get any given credit is readily available. **Customers can find a screenshot and invoice number where the refund was delivered.** Transparency is a top priority. Invoicing is done only on the credits reconciled to action taken by Zaar Consultants to secure those refunds rather than the total of the refunds listed on the shipping invoice.

Quotes

“Zaar Consultants data moves our business forward. We were able to use the robust data and reports to negotiate a better agreement with our carrier. ”

Amy S. - Product Manager

“The sheer amount of data available today can be overwhelming. The weekly digest reports supplied us with just the right amount of information we needed to stay ahead of the curve.”

Bob Z. - Logistics Sr. Director

“Zaar Consultants is the number one choice when it comes to transportation analytics.”

Billy J. - Small Business Owner
